

Supersonic sparse PINN reference v2 - FROZEN

Spectral points: 183

Raw modal rows: 838847

Tail-polished rows: not available

Counts by Mach:

M=1.10: 9
M=1.20: 14
M=1.25: 11
M=1.30: 13
M=1.33: 9
M=1.40: 14
M=1.50: 12
M=1.60: 6
M=1.70: 6
M=1.80: 49
M=1.90: 40

Validation statuses:

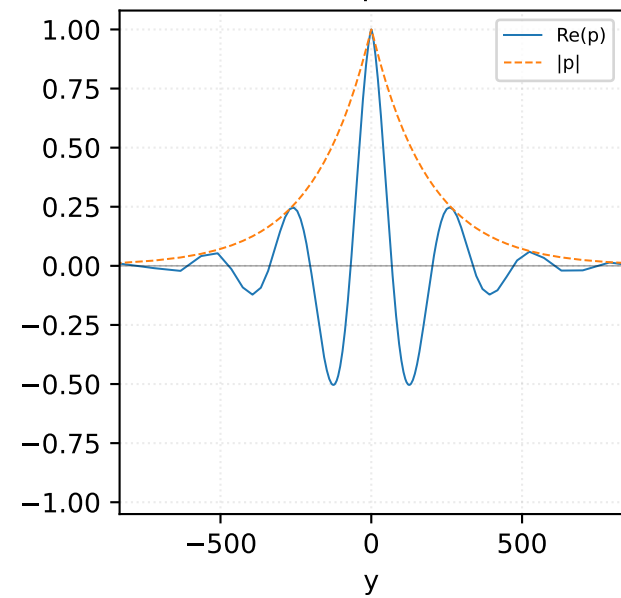

validated_core_stable_tail_sensitive: 89
modal_spectral_validated_with_exported_fields: 44
validated_visual_smallM_strict: 33
validated_visual_smallM_tail_sensitive: 12
validated_visual_smallM_strict_boundary_flag: 5

Frozen convention:

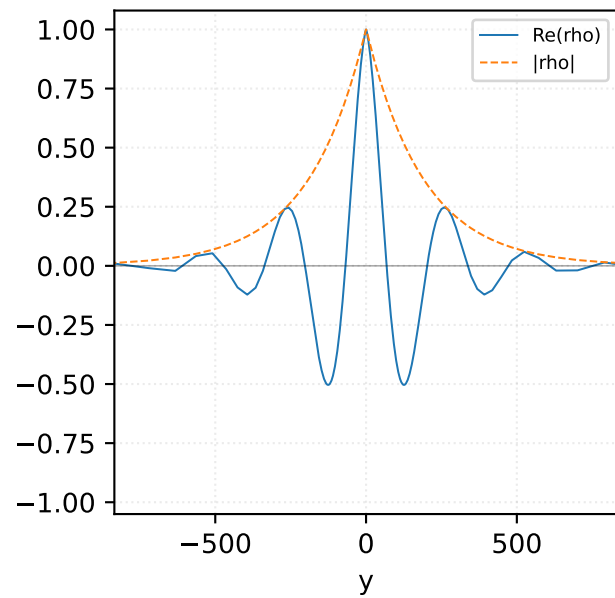

- Raw confirmed fields are the primary reference.
- Tail-polished fields are an export derivative for smoother weak left tails.
- Spectral cr/ci are unchanged by tail polishing.
- Boundary-flagged points are kept with explicit status.

FROZEN v2 tail-polished export — $M=1.10$, $\alpha=0.05000$, $cr=0$, $ci=0.04092$
