

(a) $\alpha = 0.15$ (b) $\alpha = 0.20$ (c) $\alpha = 0.25$ 

- Final classical reference
- Weakly constrained reconstruction
- Blumen bootstrap median (q_{50})
- Reference outside nominal q_{05} -- q_{95} interval
- External reconstruction unavailable

Error bars show the nominal bootstrap q_{05} -- q_{95} digitization/interpolation range; they are not calibrated statistical uncertainty intervals.
